

INSTRUCTIONS:

To determine your correct flop size, print this page on a standard 8.5" x 11" piece of paper at 100% on your home printer. We do not recommend putting your foot up to the computer screen.

Place the base of your heel to the heel of the foot print and select the smallest size that still fully encloses your foot. Foot width may vary. When done, pick your favorite color and order online at planetflops.com
